

PROCESS SIMULATION IN SUPPLY CHAIN USING LOGWARE SOFTWARE

*Sebastian Kot, Czestochowa University of Technology
Beata Ślusarczyk, Czestochowa University of Technology*

ABSTRACT: The authors present basis of simulation usage in managerial decision support focusing on the supply chain processes. In the beginning the need for simulation is presented, then advantages and disadvantages of simulation experiments and the simulation tools juxtaposition. Finally the chances of supply chain process simulation using Logware software are presented.

Key words: simulation, supply chain
